### REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: the prior art does not teach or fairly suggest, in a method of and apparatus for blow molding a container using a blow cylinder which has a cylinder body with a head cavity and a rod cavity wall, an end cap connected to the cylinder body, a piston head slidable within the head cavity, a piston rod connected to the piston head, and a blow needle connected to the piston rod, the limitations: a heel space between the piston head and the rod cavity wall, a minimum fluid pressure in the heel space, and an extend fluid at a pressure greater than minimum fluid pressure to move the blow needle to engage a parison. Regarding claims 24-30, the prior art does not teach or fairly suggest a blow cylinder with extension means, retraction means, extend fluid under variable pressure, and a retract fluid under a minimum pressure, such that the extension means move a piston assembly to engage the parison and the retraction means move a piston assembly to disengage the parison.

Both Hudson (US Patent 3,895,897) and Mehnert (US Patent 3,751,207) teach blow needle assemblies with piston means and cylinder means, but do not teach a heel space with a minimum fluid pressure therein.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
